

OTH Regensburg

TESTING BLUHM & FEUERHERDT GMBH

Founded in 1978, TESTING from its 3,000 m² headquarters today supplies testing for construction materials on all continents.

TESTING offers its customers an extensive product portfolio of building material testing systems and machines as well as complete laboratory equipment, that satisfies all requirements and wishes.

“Made in Germany” stands for the outstanding quality delivered by TESTING.

Since 1996 TESTING has been certified in accordance with DIN EN ISO 9001 and since 2015, accredited as per DIN EN ISO/IEC 17025:2005.

CUSTOMER OTH REGENSBURG

Ostbayerische Technische Hochschule Regensburg is one of the largest universities of applied sciences in Bavaria.

Eight faculties offer a wide range of study options in the form of practice-oriented Bachelor and Master degree programmes in engineering, business studies, design, architecture, health and social services.

Numerous study options, a wide choice of general-education subjects including languages and soft skills, plus further training programmes which can be taken alongside the main course of study offer an opportunity to create a personal study profile tailored to the individual's talents and affinities.

Mathematics, Microsystems Technology, Production- and Automation Engineering, Technical Computer Science can only be studied at OTH Regensburg.

OTH Regensburg is also expanding its range of dual degree courses.

PROJECT DATA

Design & equipment for 2 cement laboratories in a new laboratory building

Scope of delivery

- Combined-compression-flexure-testing machine 300/15 kN with round pressure plates
- Humidity storage cabinet for 72 mortar prisms - desktop version
- Vibrating table for three - gang-moulds
- Dust extraction system for existing mortar mixer
- Stainless steel water bath for standing mortar prisms

Stainless steel furniture

- 2 Stainless steel - work tables
- 3 Stainless steel - corner work tables
- Stainless steel - desk
- 15 Stainless steel-cabinets
- Stainless steel-as base for the unit two-door for dust extraction system-mortar mixer
- Stainless steel - sink unit
- Stainless steel - sludge trap
- Stainless steel - shelf rack with 6 bottom storage shelves for three-gang moulds
- Stainless steel - isolated application with large worktop
